

## Design

The UT2000 Rescue Litter is an outstanding choice for backcountry, high angle and general rescue scenarios. Manufactured by Traverse Rescue, the UT2000 Rescue Litter offers extreme adaptability to many diverse situations, and delivers high performance at an incredibly low weight. The UT2000 is made up of two equal parts that snap together to form a basket litter that can also be used as a sled or even a cargo carrier. Each half acts as a Pack-Frame that allows the user to load it up with the gear required for your rescue mission, yet easily convert it into a litter.

The Connectors are made of high-impact-resistant, fibre-reinforced synthetic material that are engineered to work well under high loads, and at temperature extremes.

Each Frame comes complete with a set of lifting straps that are contained in a convenient storage pocket integral with the Pack Harness.

The Pack Harness itself is professionally manufactured to withstand years of use, and can

## Features

- **Fast Connection** - Easily and quickly converts from a pack-frame to a litter.
- **Available in Wide-Glide (3 inches wider - Yellow-only)**
- **Sliding Surface** - works well in all terrain types
- **Many Options for even greater flexibility in use**
