# micrAgard

## specification

### External Materials

micrAgard is a high tenacity system with exceptional mechanical properties being entirely antimicrobial and flame retardant to aircraft standards. This lightweight super-strength material is washable, intrinsically safe, fluid repellent and rot-proof, providing excellent abrasion and tear resistance despite being light in weight.

### Perimeter Protection

External solid reflective piping and internal non rot binding finishes and protects the edges to perfection. The micrAgard specification has been purposefully designed to remove the necessity for ugly detachable base panels. The high tenacity exterior finish together with a deep layer of integral high density foam and extra base protection plates is a match for any type of handling.

### Internal Materials

micrAgard silverlining is a high tenacity system with exceptional mechanical properties being entirely antimicrobial and flame retardant to aircraft standards. It is washable, intrinsically safe, fluid repellent and rot-proof, also having a thermal quality providing excellent abrasion and tear resistance despite being light in weight.

### Zips

micrAgard silver-storm zips are water proof, again anti-microbial and self healing without those fiddly storm flaps which also means they are easier to clean. And of course you can still lock the zips through our trademark zip pulls.

### Graphics

Our embroidery is produced in house to the highest quality using the maximum amount of stitches possible for each design, ensuring it looks great and stays with the product for the whole of it's life.

## lightweight super-strength micrAgard performing in the toughest situations

- MicrAgard
- Impact resistant
- ISO quality standard
- Comfort straps
- Anti microbial
- Thermo care
- Lockable zips
- Handfinished
- Fluid repellent
- Self healing zips
- Heavy duty fittings
- Custom Branding
- Fire retardant
- Intrinsically safe
- Underside protection
- Lifetime guarantee
- Non rot materials
- Waterproof
- Hi Visibility
- Double stitched

### Handles & Straps

Carry it off in style and comfort. The Openhouse comfort grab handles are securely fastened through to the silverlining – “history tells us they don’t come off”. The silver reflective non rot webbing provides the core strength whilst the internal padded handlebar system prevents the handle crushing the hand thus providing comfortable safe carrying.

### Reflective Visibility

The micrAgard specification offers maximum visibility even when the bag is open on the roadside.

Externally, we have achieved high quality reflective coverage which will last the lifetime of the bag.

MicrAgard reflective chequer print and text is impregnated into the fabric so there are no “sewn on” reflective strips that can rip off.
